Chandan Kumar

MERN Stack Developer | React.js, Node.js, Full-Stack Web Applications | REST API & Unit Testing

Name: Chandan Kumar | Mobile: 6360487464 | Email: ck933970@gmail.com
github.com/chandanK2000 | Bangalore, Karnataka, India

Objective:

To leverage 2+ years of experience as a React/MERN Stack Developer to design, develop, and deploy **scalable, responsive, and secure web applications**, contributing to innovative projects with full-stack expertise and modern frontend/backend integration.

Summary:

- **2+ years of experience as a React/MERN Stack Developer delivering full frontend and partial backend solutions.**
- Strong expertise in **React.js, Node.js, Express.js, Python (Flask), MSSQL, MongoDB, REST APIs**, and modern frontend frameworks.
- Experienced in **role-based authentication, JWT, local Storage, subscription management, and payment gateway integration (Razorpay)**.
- Skilled in building **responsive, scalable, and secure web applications** with a focus on **component-based architecture, state management, and reusable UI components**.

Technical skills:

- **Frontend:** React.js, Next.js, Redux, Material-UI, Bootstrap, Tailwind CSS, CSS3, HTML5, TypeScript, JavaScript, Responsive Design, UI/UX, Unit Testing (Jest, React Testing Library)
- **Backend:** Node.js, Express.js, Python (Flask), REST API Development, JWT Authentication, Payment & Subscription Workflows
- **Database:** MongoDB, MSSQL, MySQL
- **Tools & Cloud:** AWS, Google Cloud, Git, GitHub, Local Storage, Cookies, Razorpay, SMS Integration

Education:

- **MCA** – Jain University, Karnataka (2024)
- **BCA** – SNS College, BRABU, Bihar (2020)
- **Intermediate** – Bihar Intermediate Education Council, Patna (2017)
- **10th** – Zila School, Bihar Board, Patna (2015)

Professional Experience

Software Engineer | Datanoveltech | Jan 2025 – Present
Client: Wipro Kawasaki **| Technologies:** React.js, Bootstrap, CSS, Python (Flask), MS SQL, JWT **| Deployment:** On-premise
Client Project: Hardware Parts Management System

- Developed **responsive frontend for a hardware production and parts management system** deployed locally at client site.
- Implemented **secure login/registration, JWT authentication, and role-based dashboards** for Admin/User roles.
- Built **Production Plan, Serialized Issue, Item Master, and Parts Management modules** with search, filtering, and print functionality.
- Developed **Admin Dashboard** with full tab access control for users, parts, and production data.
- Ensured **cross-browser compatibility and responsive UI**, improving planning, tracking, and reporting efficiency.
- Delivered **high-quality, maintainable frontend code**, enabling seamless workflow and reducing manual tracking.

Internal Company Projects:

1. **Datanoveltech Website** (datanoveltech.com)
    - Developed **entire frontend from scratch**, integrated with Python Flask backend and MS SQL.
    - Implemented **login/registration, JWT authentication, password management**, and responsive UI.
    - Managed **local Storage session handling** and end-to-end project delivery.
2. **Warehouse Management System**
    - Complete frontend development with **role-based access for Admin and Users**.
    - Managed multiple **warehouses and AI-based models** (Face Recognition, Gunny Bag, Vehicle OCR, Crowd Counting).
    - Built **Admin Dashboard**, Warehouse, Employees, Vehicles, Reports, Process, and Monitoring tabs.
    - Enabled **single-click model control**, search, filtering, pagination, and logout functionality.
    - Independently handled **Razorpay payment integration and SMS notifications** using Node.js backend.
    - Delivered a **responsive and secure frontend**, improving operational efficiency and process tracking.

React.js Developer | Payrup | Aug 2022 – Jun 2023
Technologies: React.js, Material-UI, CSS, REST APIs

- Developed **UI components based on Figma designs** with Material-UI.
- Created **responsive layouts and reusable React components**.
- Assisted in **API integration (GET/POST/PUT/DELETE)** and module testing.
- Ensured **design consistency and usability** across modules.
- Delivered **visually accurate and user-friendly interfaces**, aligning with project requirements.
